Project Design Phase-I

Proposed solution

Date	10 October 2022
Team ID	PNT2022TMID45895
Project Name	Job and skill Recommender
Maximum Marks	2 Marks

Proposed solution:

S.NO	Parameter	Description
1	Problem Statement (problem to be solved)	Recommend the suitable job related to their skills.
2	Business Model (Revenue Model)	Revenue can be generated by selling the whole kit, The revenue can also be obtained by ad service, where they can inspect the system, for that service they can charge the customers.
3	Novelty/Uniqueness	In this application we provide extra link-features for applying a job that recommended by application.
4	Scalability of the solution	Whatever Skill may be given but skill/job application don't fail to give recommendation.
5	Idea/Solution description	We have come up with new innovation solution through which you can directly choose your job related to your skills without need help from someone. You can search a job based on your skills and also chat with chat bot for get specified skillsets. We develop an end-to-end web application capable of displaying the current job openings based on the user skillset. User can login into application and search a job otherwise chat bot via entering, skills to the bot, it suggest some job based on entered skills and also it update latest. Jobs everyday Lists or jobs are uploaded into databases and their connected database once user enter skill into chat bot it will search related job in database then it display various jobs related to skills.
6	Social Impact/Customer Satisfaction	Job andskillrecommended Application

		which is helpful for people who had lot of skills and choose an best field or job related to skills.
